

EZArtemia

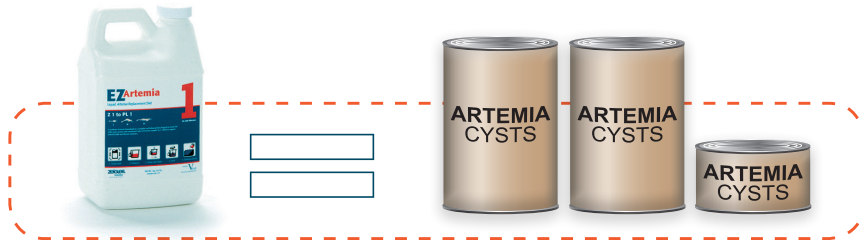

Liquid Artemia Replacement Diet

Available Nutrition:

A Comparison of EZArtemia to Artemia

The key to understanding nutritional benefit is to first identify the nutrient weight of each product.
Water must be subtracted from this equation.

EZArtemia = 1kg

INITIAL WEIGHT

2.35 x 425 g cans
of Artemia Cysts = 1 kg.

No Processing,
No Hatching Required

Hatched Artemia:
Assume 2.7 kg wet weight
Artemia (varies from 2-3 kg)

Weight lost = Cyst Shells
Weight gained = Water

EZArtemia =

Hatched Artemia =

73%

MOISTURE

90%^{1,2}

27%

NUTRIENT MATTER

10%

270 g

DRY WEIGHT NUTRIENT MATTER

270 g

One unit of EZ Artemia has a comparable quantity of nutrient matter to an equal quantity of dry Artemia cysts after they have been hatched. EZ Artemia is formulated to match the nutritional content of enriched Artemia. It also contains beneficial probiotics and Vpak, an all-natural, highly purified nutritional additive shown to improve survivability and production yields.
