

# African Finfish Catfish

Meeting your nutritional needs for **successful aquaculture!**

The Zeigler **Finfish African Catfish** program is designed with *Clarias* spp. culture in mind. We understand the unique nutritional requirements and varied culture conditions where this species is raised. Zeigler diets are proven to be highly digestible and result in fast growth rates and improved water quality in production systems.

Zeigler is proud to offer a unique line dedicated to the culture of African Catfish. Zeigler products cover all lifestages beginning with our specialty weaning formula (**Larva Z Plus**) and culminating with three options for growout depending upon your production parameters and goals.

Zeigler **Starter & Fingerling** feeds have been the industry standard for many years. Today, all our Pro-Start starter and fingerling starter feeds contain Vpak, an all-natural immunostimulant that supports juvenile development and promotes higher survivals in stressful culture conditions.

- Inclusion in starter feeds reported to improve survivals and yields in grow-out.
- Proactive mechanism for fighting viruses and pathogens.
- All-natural alternative to antibiotics; Safe, biodegradable and residue-free.
