

Vpak (Vitality Pak), is a natural feed supplement containing a blend of organic acids, essential oils, and postbiotics to enhance gut health, feeding efficiency, and immune function. It can play a critical role in any integrated health management plan. Field results have demonstrated improved animal performance and farm profitability when feeding Vpak.

Vpak Benefits:

- **Increased Stocking Densities** - Reduces impact of stress associated with increased stocking densities.
- **Higher Survivals** - Improves protection against fish pathogens resulting in higher survivals.
- **Better Feed Conversions** - Enhances gut health and nutrient absorption for better feed conversions.
- **Greater Production Yields** - Allows for less days off feed during stressful conditions to improve production yields.
- **Integrated Health Management** - Promotes increased effectiveness of vaccinations and chemical therapeutants.
- **Antibiotic-Free Solution** - An alternative to antibiotics by naturally improving immune response without residues or environmental impact.

Lab and Farm Tested!

Vpak Characteristics:

- Naturally occurring bioactive compounds
- Essentials Oils with antimicrobial properties
- Organic Acids for gut health & energy production
- Immune stimulants for disease resistance
- Anti-inflammatory to protect against cell damage
- Highly palatable for animal consumption
