

Shrimp Broodstock

Shrimp Grower Feeds

Shrimp Broodstock diet is expressly formulated to meet the known dietary needs of shrimp broodstock. Superior quality ingredients are chosen to provide a complement of prime marine proteins and oils, making the diet highly attractive and palatable to the shrimp. It is power-packed with those special ingredients required to aid in female gonad development. Additionally, Zeigler Broodstock contains skillfully selected vitamin and mineral packs known to enhance the health and vitality of broodstock and their spawn.

Features & Benefits

- Excellent water stability of the feed
- Superior quality ingredients
- Improved female gonad development
- Dramatically reduced time in Maturation System to initial spawn
- Stronger, healthier Broodstock
- Long term nauplii quality benefits

Product Application & Storage

- This well-formulated diet is fed to shrimp in a broodstock program at a rate of 3% of shrimp biomass. It is optimum for use in pond and tank; open or closed systems.
- Best if used within nine (9) months from date of manufacture.
- Store in cool, dry, well ventilated area. Rotate stock to use the old feed first – “first in, first out” principle. Keep bags stacked on pallets to prevent feed from being in direct contact with damp floors and walls. Avoid exposure to insects, pests and direct sunlight.

Packaging

25 Kg (55 lb.) poly woven bag

Guaranteed Analysis

Crude Protein	Minimum	40.0%
Crude Fat	Minimum	9.0%
Crude Fiber	Maximum	2.5%
Moisture	Maximum	10.0%
Ash	Maximum	12.0%

Particle Size

3/32" (2.4mm) pellet
