

# Avian Maintenance

for Waterfowl, Pheasants, etc.

Zeigler Avian Maintenance diet is formulated as a complete balanced diet for use in feeding birds, including waterfowl, pheasants and other species. This diet supplies all needed nutrients as identified by leading avian and zoo nutritionists. In addition, the formula is standardized to contain fixed quantities of the highest quality raw ingredients.

## FEEDING SUGGESTIONS

Avian Maintenance diet should be fed free choice as the total diet; no supplementation is required for normal healthy birds. As a guide, most birds will consume the equivalent of one-fifth of their body weight per day. However, feeding requirements will vary depending on species, environment, level of activity and stress factors. Fresh water and grit should be available at all times.
