## Complete Diet for Pond Fish

Zeigler Pond Sticks are a nutritionally complete and balanced diet for all pond fish. The diet is formulated with stable vitamin C and brewers yeast to help improve immune function and promote healthy tissue development. Higher levels of marine protein sources are incorporated to maximize palatability and digestibility. Pond Sticks are a wheat based diet, ideal for feeding during colder periods of the year. The low protein/low fat content makes it a lower energy diet that is easily digested when fish are experiencing colder water temperatures. Pond Sticks are also supplemented with *Vpak*<sup>™</sup>, an all-natural additive, to help increase resistance to diseases. As with all Zeigler diets, Pond Sticks are manufactured according to ISO-9001 guidelines.
